

Certainly! Here's the revised version for your Cape Cod workshop:

---

The following items are recommendations for your upcoming **CAPE COD** workshop.

Please note that most items are not necessary for you to participate in the workshop, but are encouraged if you already own them. If you do not own items on the list, there is no need to purchase them. This workshop will be a place for you to learn from your instructors and other participants about their equipment preferences.

### ### EQUIPMENT

- **Camera Body**
- **Back-Up Camera Body**
- **Tripod legs & head**

### ### LENSES

- **Wide Angle (14-24mm range)**
- **General (24-70mm range)**
- **Telephoto (70-299 mm range)**
- **Super long Telephoto (if you have one)**

### ### FILTERS

- **Graduated Neutral Density**
- **Neutral Density (5-10 stop)**
- **Polarizer**

### ### MISC EQUIPMENT

- **Cable Release**
- **Cleaning Cloths**
- **Batteries & Charger**

- **Memory Cards**
- **Rain/water cover for camera/lens**

### ### TECHNOLOGY

- **Laptop Computer**
- **Power supply**
- **Card reader with cables**
- **Jump drive**

\\*Make sure to bring more batteries and memory cards than you think you need!

---

**Weather in Cape Cod in September** is typically cool in the mornings with temperatures rising to the 70s during the day and mostly dry conditions. Bringing layers to account for varying temperatures throughout the day is recommended. While the chance of rain is low, it's always wise to be prepared, especially when photographing near water, so bringing a rain or waterproof cover for your camera and lens is advisable. Please make sure to stay hydrated, drinking water throughout the day as well as at night.

I like to carry a back-up camera in the field. It is not necessary, but if you have a back-up camera, please consider packing it. I have seen even new cameras fail in the field from time to time.
